

Plasma Display Stand

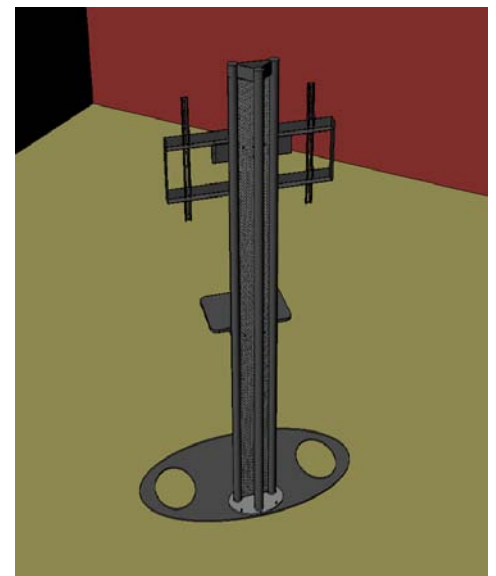

- The Big City plasma stand can be used to display LCD or plasma screens of up to 50" in size, at heights of up to 2 metres.
- It is available with an oval base for fixed display purposes, or with a mobile base on lockable castor wheels that may be moved around easily.
- A shelf for mounting DVD or other audio-visual equipment is supplied, and may be mounted at any convenient height.
- It comes supplied with a universal hook & rail bracket, plus mounting hardware, to suit a range of industry-standard screen sizes.
- An optional back & clip bracket system to suit individual screen models is available upon request. This allows portrait or landscape mounting of the screen.
- The stand may be ordered in standard heights of 0.95m, 1.8m or 2m. Alternative heights are available upon request.
- A heavy duty tri-pole version is available to mount screens greater than 50" in size.
- A soft padded bag is available for the stand and base to give greater protection during transport & storage.
- The plasma stand comes with a powder-coated finish and is constructed from steel for durability & years of trouble-free service.
